# Change : The Future is in Scope {} - Are you Inclined ?

---

**Change is Positive**  
**{ It Brings Enduring Transformation }**

---

**Change is Progress.**  
**{The Smallest Decision can make the Biggest Difference }**

---

**Change is Inevitable**  
**{ The Sooner we open up to it, the Better }**

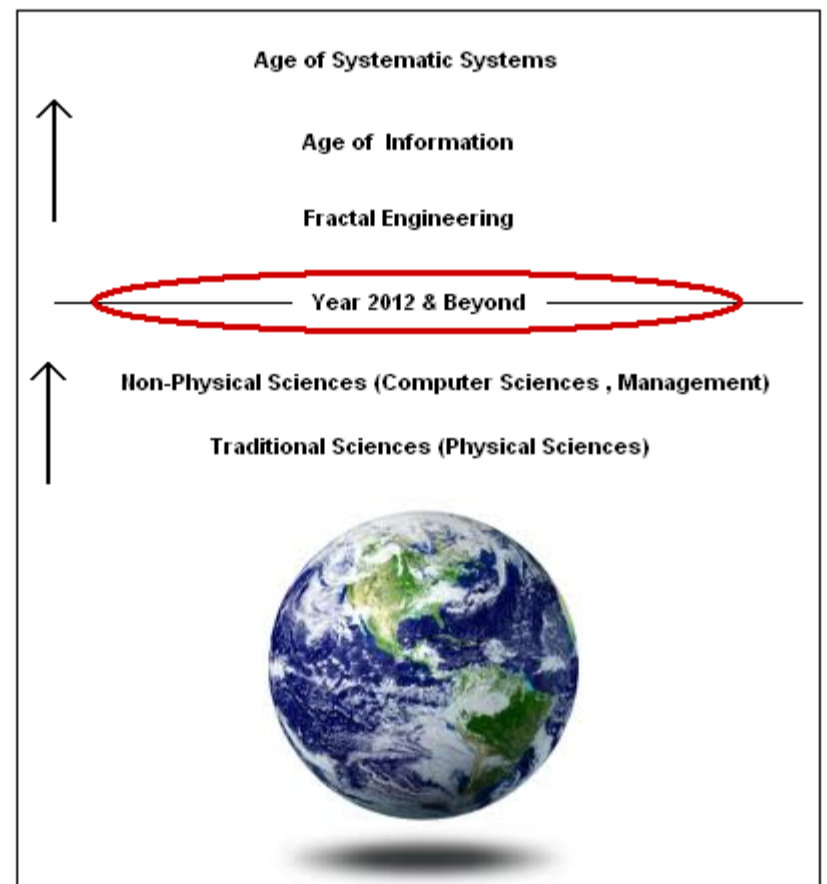

---

**Change is the essence of Life**  
**{ If we Dont Change we dont grow }**

---

**Change is the Future**  
**{ And it is here Right now }**

---

**Change Promises Maximum Transformation**

**Why merely observe this Maximum Change  
when you can Partner it !**

---

# Project Blue Shift

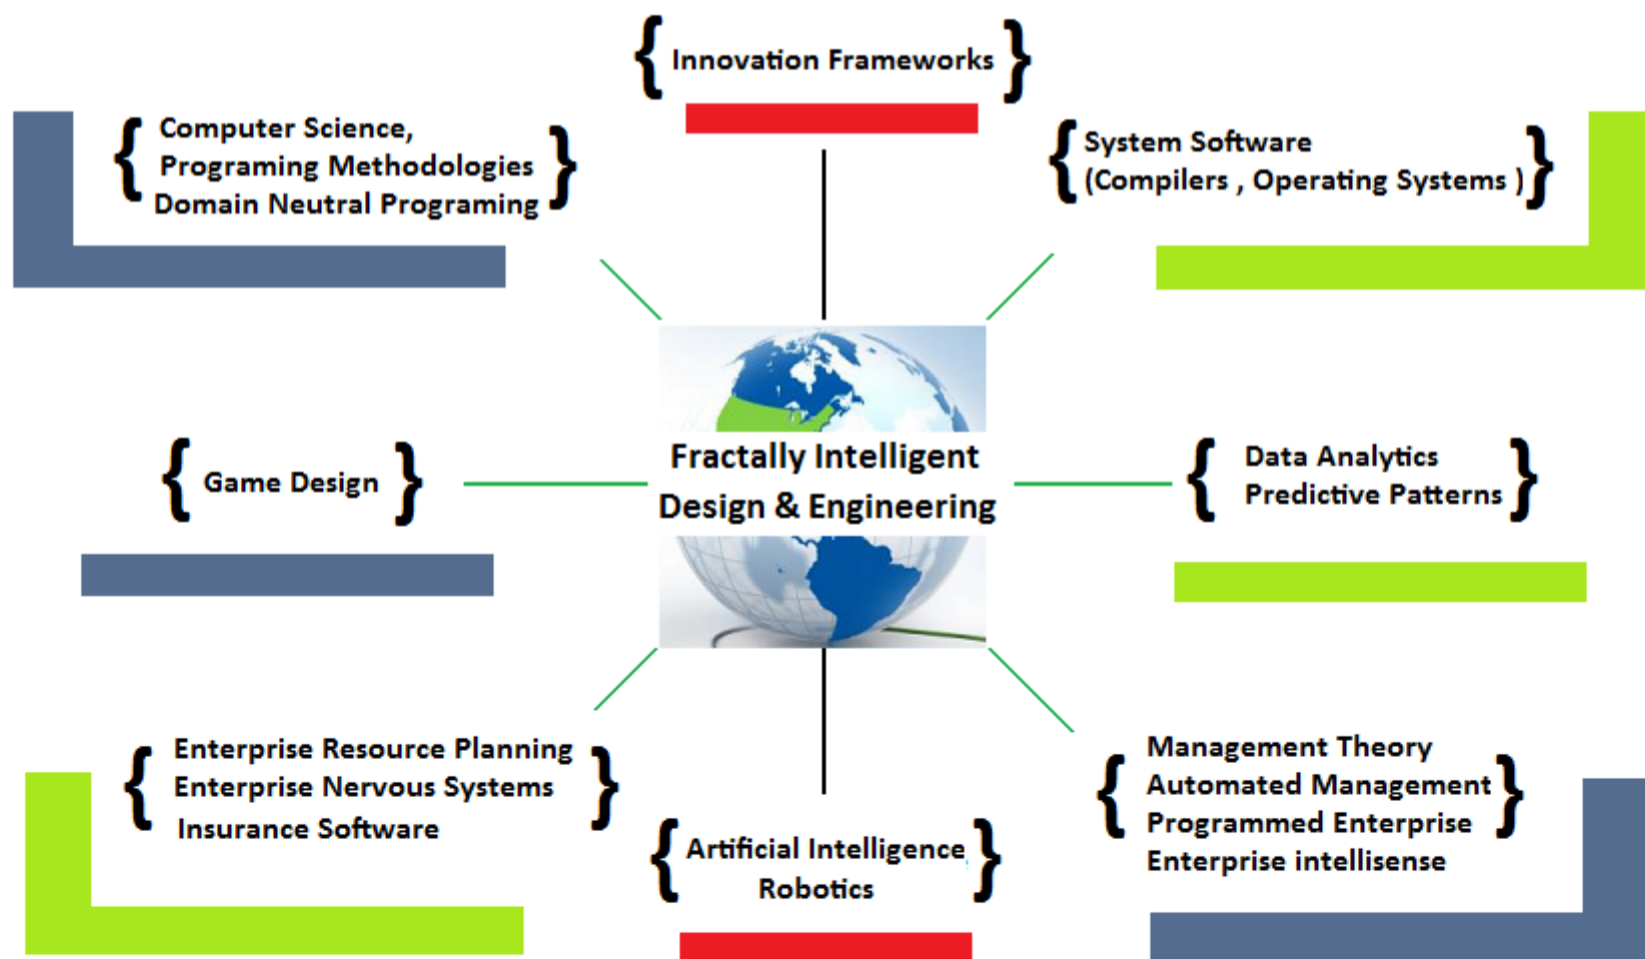

T&C Vectors has been Involved in Research & Development under the scope of a project titled: "Project Blue shift" , studying the convergence of Design in Nature ,Design in Science and Design in Technology. Eight years of Cutting Edge Applied Research has culminated in absolute breakthrough Findings leading to a world changing Science called - Fractal Engineering. It derives it's fundamentals from Visual Mathematics & the MathematicalPhysics subject "Mathmatical Fractals" invented by IBM Fellow :Benoît Mandelbrot. Fractal Engineering techniques simulate Universe's(Natures) technique of Perfect creation.

Fractal Engineering(The Newest Engineering Science / a Master Science (Super Science) - is a SuperSet as well as an abstraction of an array of Sciences viz: ComputerScience - Analytics Sciences -Software Engineering - Systems Engineering -Economics - Engineering - Advanced Mathematical Physics - ManagementScience - Architecture. It impacts the Worldwide Enterprise Ecosystem in extremely significant ways (Education and Industry).

Why another Engineering Science at all ? Recent Research Directions have become very fragmented and numerous patents are filed by leading enterprises worldwide everyday.However the Fragmented findings lose it's efficacy in application in the world ecosystem.This has led us to invent a new form of science that is unparalled in scope and scale of its applications. More precisely - specialized (Physical and Non physical) sciences are unable to solve today's real world problems entirely because of their scope. It is well to understand that science itself was divided as a subject to allow for further research and specialization.It is for human ease of understanding tht such Artificial divisions of science were created. Todays real world problems do not exactly fit into a single realm of a Specialized science.The solution was to create a super set of Sciences that could solve problems to their entirety. We are excited that the advent of such a science will bringing into scope new frontiers in Scientific Thinking and herald the next wave of Discoveries and Findings to this world. Although Fractal Engineering as a science has built the necessary foundations for immediate application, there is a large room for Discovery - Research and further maturity of the science.

Application of Fractal Engineering would lead to numerous new terms like Autonomic Enterprise Systems , The Programmed and Managed Enterprise,Enterprise Intellisense ,Enterprise Nervous Systems and World Digital Lifelines systems. In shorter terms It's a Discovery that "changes everything" or "Redefines Definition" and adds a "Absolutely New Purpose" to life.We are sure our Findings are going to replace the Foundations of a Multitude of Subjects,Consolidate knowledge and create New Knowledge that's going to create and sustain a Brilliantly intelligent new Future. We hope to live by our visions objective to truly "Solve Equations of Changing Times

## Research & Innovation : Areas of Application

### Other Areas :

- < Digital Economic Lifeline Systems >
- <Machine Systems >
- <Enterprise Digital Engagement Protocols >
- <People Solutions >

## Scope of Engagement

---

The Question is How much new knowledge can you effectively handle ? In a world where Knowledge is power and Wealth & fame , how prepared are you to take on the future and sustain it ? Not everything is monetary. There's something more important - A Responsibility called -"The Prestige".

Genuine Research Teams - Enterprise Management Teams -Innovation specialists may recognize the sparks of Foundational Transformation .

To be a Part of an exciting Future and learn about the deepest secrets of the Universe, Engage with us One to One.

- 1. Contract Research & Consultancy**
- 2. Intellectual Property Partnership**
- 3. Joint Venture Partnership**
